DIVISION REPORT ERP/TID 81-01(LS)

PREFACE

This bibliography selectively lists reports, papers and articles published or authored by CANMET (formerly Mines Branch) in connection with the research and coal evaluation activities of the Canadian Carbonization Research Association (CCRA). Over the years CANMET has issued a great many documents pertaining to CCRA work. The purpose of this bibliography is merely to present a representative sample that will give an overview of the project work that has been undertaken. Some of the documents listed are reports on specific CCRA projects; others are only peripherally related. The bibliography is neither exhaustive nor exclusive in its coverage of CCRA-related materials.

All the documents listed in this bibliography are in the public domain.

The CCRA was formed in 1965 with membership from the major coal and steel industries of Canada. Its principal objective is to promote and sponsor, in a cooperative setting, research and development in the making of blast furnace coke from metallurgical coals of interest to member companies. The secretariat for the Association, and the centre for research, are provided by the Coal Resource and Processing Laboratory of CANMET.

Information on the goals and activities of the CCRA can be obtained by writing to

Dr. D.A. Reeve
Secretary, CCRA

ANNUAL REPORTS OF THE CCRA AND MINUTES OF MEETING OF THE BOARD OF DIRECTORS AND THE TECHNICAL COMMITTEE	10
ACKNOWLEDGEMENTS	11

CANADIAN METALLURGICAL COALS - GENERAL

Botham, J.C. "Coking coal of western Canada assume growing importance"; Northern Miner; 61:1:35-36; May 1, 1975.

Botham, J.C. "Full potential of Canadian coking coals still to be realized"; Northern Miner; 62:37:C23-C25, C30; Nov. 25, 1976.

Botham, J.C. "Metallurgical coals"; CANMET Seminar on Resource Assessment; 16 December 1975; DS 76-13 (INFO); 26-43; 1976.

Botham, J.C. "Project reports concerning the development of a market in Japan for western Canadian coking coals"; DR FRC 69/43-MET; Mines Branch; 1969.

Botham, J.C. and Donaldson, J.R. "Coking coals of eastern Canada differ from those of the west"; Northern Miner; 62:6:A5-A7; April 22, 1976.

Botham, J.C. and Jorgensen, J.G. "Western Canadian coals for cokemaking"; Proc 33rd Ironmaking Conf; AIME; April 28-May 1, 1974; Atlantic City, N.J.; 33:347-371; 1974.

Donaldson, J.R. and Botham, J.C. "Bibliography of the coking coals of Eastern Canada"; Division Report ERP/ERL 76-6(LS); CANMET; 1976.

Reeve, D.A. and Botham, J.C. "Quality of Canadian metallurgical coal in the Japanese and world markets"; Division Report ERP/ERL 77-34(OP); CANMET; 1977.

Walsh, J.H. et al. "A future for western metallurgical coals"; Proc 21st Can Conf Coal; September 9-11, 1969; Calgary, Alberta; 84-96; 1969.

INDUSTRIAL OPERATIONS - GENERAL

Botham, J.C. "Air pollution from the coke industry"; Divisional Report MREC 70/7; Mines Branch; 1970.

Botham, J.C. "Carbonization in Canada"; Can Min Metall Bull 61:669;62-73; 1968.

Paulencu, H.N. and Rawson, R.N. "Technical visit to Europe re: current developments in the coal and coke industry"; Divisional Report MREC 72/131; Mines Branch; 1972.

RESEARCH AND DEVELOPMENT

GENERAL

Botham, J.C. "Research and development in non-conventional carbonization in Canada"; Division Report FMP 67/5 CG; Mines Branch; 1967.

Botham, J.C. and Brown, T.D. "Innovations in cokemaking and the role of the Canadian Carbonization Research Association"; Can Min Metall Bull 73:813:101-106; 1980.

Botham, J.C. et al. "EMR facilities in western Canada for the evaluation of Canadian coking coals"; Proc 25th Can Conf Coal; Sept. 16-19, 1973; Victoria, B.C.; 85-96; 1973.

Botham, J.C. et al. "Research and development in conventional coke-making"; Proc 17th Dom Prov Conf Coal; Sept. 9-10, 1965; Victoria, B.C.; 179-208; 1965.

Botham, J.C. and Taylor, G. "Cokemaking research at CANMET play important role in coal industry"; Northern Miner 64:24:B6-B7,B9; August 24, 1978.

Brown, T.D. et al. "The role of CANMET in the research activities of the Canadian Carbonization Research Association"; Division Report ERP/ERL 80-59(OP); CANMET; 1980.

Drake, C.W. and Walsh, J.H. "Objectives of the Canadian Carbonization Research Association"; Can Min Metall Bull 60:658:203-206; 1967.

Reeve, D.A. and Botham, J.C. "Directions in coal carbonization research in metallurgical fuel engineering group"; Divisional Report MREC 72/114; Mines Branch; 1972.

Staff of the Coal Resource and Processing Laboratory, "Canadian Carbonization Research Association research activities at CANMET"; Division Report ERP/ERL 80-50(OP); CANMET; 1980.

Walsh, J.H. et al. "Historical review of Mines Branch preparation, carbonization and marketing participation with western coal producers"; Divisional Report MREC 72/73; Mines Branch; 1972.

COAL EVALUATION

Botham, J.C. "Carbonization characteristics of reference coals, Part I"; DR FMP 67/19 CG; Mines Branch; 1967

Botham, J.C. "Carbonization characteristics of reference coals, Part II"; DR FD 67/59 CG; Mines Branch; 1967.

Botham, J.C. "The growing importance of the application of the petrography of Canadian coals to coke making"; Division Report ERP/ERL 75-84(OP); CANMET; 1975.

Botham, J.C. "Preliminary report of ASTM subcommittee XV second movable-wall oven round robin test"; Divisional Report FMP 66/110-CG; Mines Branch; 1966.

Jorgensen, J.G. et al. "Petrographic and related analyses of an Itmann low volatile reference coal"; Divisional Report MREC 71/76; Mines Branch; 1971.

Jorgensen, J.G. and Glaude, C.H. "Stelco-Mines Branch round-robin on thermal rheological properties of coals from Stelco"; Divisional Report MREC 72/61; Mines Branch; 1972.

Reeve, D.A. "The canister test for evaluating the coking properties of metallurgical coal"; Division Report ERP/ERL 75-140(TR); CANMET; 1975.

Steele, D.C. "A study of the Gieseler plastometer"; MREC 70/75; Mines Branch; 1970.

COKE PROPERTIES: PREDICTION AND EVALUATION

Botham, J.C. "Electrical resistivity of coke with special reference to foundry coke"; DR FMP 67/12-CG; Mines Branch; 1967.

Botham, J.C. et al. "The evaluation of coke quality"; Symposium on Coal Evaluation; Information Series 76; Alberta Research Council; 90-107; 1974.

Campbell, D.W. "The coefficient of contraction of coke Part II - The high temperature dilatometer - modifications and procedures"; Divisional Report MREC 74/71; Mines Branch; 1974.

Gransden, J.F. et al. "Correlation of ASTM stability with Japanese industrial coke drum indices - Update"; ISO/TC 27/SC 3N-103; International Organization for Standardization; 1978.

Leeder, W.R. "Coke tumbler tests Part II - A statistical analysis of the 1973 round robins"; Divisional Report MREC 74/37; Mines Branch; 1974.

Leeder, W.R. "Coke tumbler tests (ASTM) Part 3 - A proposal for 1974 CCRA sponsored round robin between MREC and industry"; Divisional Report MREC 73/106; Mines Branch; 1973.

Leeder, W.R. "A re-run of the ASTM tumbler tests between Stelco and MREC"; Divisional Report MREC 73/55; Mines Branch; 1973.

Leeder, W.R. et al. "Prediction of coke quality with special reference to Canadian coals"; Proc 38th Ironmaking Conf; AIME; March 25-28, 1979; Detroit; 38:385-397; 1979.

Leeder, W.R. and Gardiner, W. "A statistical analysis of the results from a

CCRA-sponsored round-robin test series on the ASTM tumbler test for coke"; Investigation Report IR 73-22; Mines Branch; 1973.

Leeder, W.R. and Jonasson, K.A. "Statistical correlation of ASTM and JIS coke tumbler test results"; CANMET Report 77-47; 1977.

Leeder, W.R. and Misener, D.C. "Coke tumbler tests (ASTM) Part III - Mechanical assessment of the MREC equipment"; Divisional Report MREC 73/110; Mines Branch; 1973.

Nandi, B.N. "Petrographic prediction of coke stability values of reference coals"; FD 67/94-MET; Mines Branch; 1967.

Reeve, D.A. "Coke in the gas-solids counter-current reactor"; Divisional Report MREC 74/20; Mines Branch; 1974.

Reeve, D.A. "Comments on the reduction of coke in the blast furnace"; Divisional Report MREC 74/54; Mines Branch; 1974.

Reeve, D.A. et al. "High-temperature behaviour of blast furnace coke - A review"; CANMET Report 77-60; 1977.

Reeve, D.A. et al. "Measurement of the reactivity of carbons for metallurgical processes, Part I - Theoretical considerations; Part II - Reactivity of crushed coke"; Technical Bulletin TB 154; Mines Branch; 1972.

Walsh, J.H. "Coke for the modern blast furnace burden"; Divisional Report FMP 67/34-MET; Mines Branch; 1967.

TECHNICAL-SCALE OVENS: DESIGN AND OPERATION

Botham, J.C. "Aide memoire - Comments regarding progress in standardization of Mines Branch movable-wall coke ovens Nos. 18-70 and 12-71"; Divisional Report MREC 71/101; Mines Branch; 1971.

Botham, J.C. "Aide memoire - Status of project commitments in the Mines Branch 12-inch movable-wall coke oven"; Divisional Report FRC 69/34-CG; Mines Branch; 1969.

Botham, J.C. "Koppers movable-wall test oven owned by Algoma Steel Corporation and offered as donation to Mines Branch - Aide memoire"; Divisional Report MREC 72/53; Mines Branch; 1972.

Botham, J.C. "Visit to research laboratories in relation to construction of a new MW test oven at the Mines Branch Corkstown Laboratories"; Divisional Report FMP 67/23-CG; Mines Branch; 1967.

Cameron, D.D. and Lorince, P.C. "Operating crew checklist for Mines Branch 12-inch movable-wall coke oven No. 1271"; Divisional Report MREC 72/17; Mines Branch; 1972.

Cameron, D.D. and Reeve, D.A. "Status of pressure measurement calibration techniques for the Mines Branch movable-wall coke oven"; Divisional Report MREC 73/80; Mines Branch; 1973.

Leeder, W.R. "Correlation studies between the Mines Branch coke oven, Investigation No. 2: Comparison of oven stabilities"; Divisional Report MREC 74/72; Mines Branch; 1974.

Leeder, W.R. "Correlation studies between different coke oven results, Investigation No. 1: Graphical method for preliminary results"; Divisional Report MREC 72/103; Mines Branch; 1972.

Leeder, W.R. et al. "Comparison of commercial and CANMET pilot oven quality: Part I: Company A"; Division Report ERP/ERL 79-51(TR); CANMET; 1979.

Leeder, W.R. and Price, J.T. "Comparisons of coke produced in different CANMET coke ovens, Part 1: 12- and 18- inch oven coke strengths"; CANMET Report 77-46; 1977.

Lorince, P.C. and Cameron, D.D. "Operation and calibration of load cells on the Mines Branch 18-inch movable-wall coke oven"; Divisional Report MREC 71/54; Mines Branch; 1971.

Lorince, P.C. et al. "Calibration of the pressure measuring system of Mines Branch 12-inch movable wall coke oven (No. 1271)"; Divisional Report MREC 72/9; Mines Branch; 1972.

Lorince, P.C. et al. "Calibration of the pressure measuring system of the Mines Branch 18-inch movable wall coke oven (No. 18-70)"; Divisional Report MREC 72/64; Mines Branch; 1972.

Marwaha, V. "Engineering modifications to CANMET test ovens and related pilot plant facilities: Part II: Unattended operation of Ottawa test ovens"; Division Report ERP/ERL 80-40(TR); CANMET; 1980.

Marwaha, V.R. and Cameron, D.D. "CANMET coke test ovens (Ottawa): Equipment details and operational procedures"; Division Report ERP/ERL 80-3(TR); CANMET; 1980.

Marwaha, V.R. et al. "Engineering modifications to CANMET test ovens and related pilot plant facilities: Part I: Repair of Ottawa test ovens"; Division Report ERP/ERL 79-47(TR); CANMET; 1979.

Price, J.T. and Leeder, W.R. "Comparisons of coke produced in different CANMET coke ovens: Part 2: 12- and 18-inch oven results"; Division Report ERP/ERL 78-70(TR); CANMET; 1978.

Reeve, D.A. and Botham, J.C. "Calibration of pressure measuring systems of movable-wall coke ovens"; Technical Bulletin TB 185; Mines Branch; 1974.

Rolston, R.L. "Preliminary tests on the tar recovery and back pressure control for Mines Branch coke ovens"; Divisional Report MREC 73/78; Mines Branch; 1973.

COKEMAKING INNOVATIONS

General and Miscellaneous

Botham, J.C. and Montgomery, E.W. "Some recent observations in experimental coke-making"; Proc 28th Ironmaking Conf; AIME; April 14-16, 1969; Toronto; 28:124-144; 1969.

Gardiner, W. and Botham, J.C. "Experimental work on the 12-inch movable-wall coke oven to examine the effects of varying the bulk density and moisture contents of selected charges"; Divisional Report MREC 74/91; Mines Branch; 1974.

Gransden, J.F. et al. "Cokemaking with Canadian medium- and high-volatile commercial coking coals"; CANMET Report 80-4E; 1980.

Gransden, J.F. and Leeder, W.R. "The effect of several carbonization variables on the quality of coke produced in 18-inch movable-wall coke oven"; Division Report ERP/ERL 77-105(TR); CANMET; 1977.

Gransden, J.F. and Leeder, W.R. "Influence of flue temperature and coal preparation on coke quality in 460-mm technical-scale coke oven"; CANMET Report 79-18; 1979.

Leeder, W.R. "Additions of discarded automobile tires to coke oven blends"; Fuel 53:4:283-284; 1974.

Leeder, W.R. "The effect of mechanical gas pressures on the carbonization of coal"; Divisional Report MREC 72/3; Mines Branch; 1972.

Leeder, W.R. "The effect of several carbonization variables on the coke quality of the coking blends carbonized in the Mines Branch Koppers 12" coke oven"; Divisional Report MREC 74/102; Mines Branch; 1974.

Leeder, W.R. "A project proposal to utilize discarded automobile tires in coking processes"; Divisional Report MREC 73/35; Mines Branch; 1973.

Nandi, B.N. and Botham, J.C. "The effect of depth of overburden on the coking properties of coal from the new Lingan Mine, Harbour Seam, N.S."; Division Report ERP/ERL 76-11(OP); CANMET; 1976.

Price, J.T. et al. "Pitch and petroleum coke additions to coke oven charges"; Can J Chem Eng 58:3:339-347; 1980.

Reeve, D.A. and Hampel, K.F. "The effect of fluidity on oil and bitumen additions to two Western Canadian coals"; Divisional Report MREC 74/10; Mines Branch; 1974.

Staff, Coal Resource and Processing Laboratory "Influence of coking variables on the quality of coke produced in a technical-scale coke oven"; Division Report ERP/ERL 78-80(OP); CANMET; 1978.

Antifissurant Program

Botham, J.C. "Aide Memoire. A progress report and recommendations regarding projects on the use of antifissurants in coke oven charges"; Divisional Report MREC 72/1; Mines Branch; 1972.

Carr, A.H. "Results of microscopically determining levels of coke fine additions relating to the Stelco antifissurant program, utilizing an automatic scanning method"; Division Report ERP/ERL 75-82(TR); CANMET; 1975.

Fung, A.B. "Investigation of the effect of the addition of Algoma coke fines to Algoma coke blends"; Divisional Report MREC 73/7; Mines Branch; 1973.

Hartman, J.H. and Jorgensen, J.G. "Preliminary results of determining microscopically levels of coke fine additions to coal blends relating to the antifissurant coking program"; Divisional Report MREC 72/77; Mines Branch; 1972.

Leeder, W.R. "A project proposal to utilize coefficient of contraction of coke for antifissurant investigations"; Divisional Report MREC 72/116; Mines Branch; 1972.

Morris, C.G. "Coke fines addition to coal blends in a 30-lb slot-type oven"; Divisional Report MREC 72/85; Mines Branch; 1972.

Reeve, D.A. "A preliminary assessment of the use of Canmore coal as an antifissurant for use in coke oven charges"; Divisional Report MREC 73/1; Mines Branch; 1973.

Reeve, D.A. and Paulencu, H.N. "Evaluation of coal blends containing antifissurant agents for cokemaking"; Proc 34th Ironmaking Conf; AIME; April 13-16, 1975; Toronto; 34:135-159; 1975.

Rolston, R.L. "An investigation into the possibility of using Canmore charred semi-anthracite as an antifissurant agent in coke oven charges"; Divisional Report MREC 73/2; Mines Branch; 1973.

Charge Preheating

Botham, J.C. "The effects of drying and preheating coal on carbonization. Part 1"; DR FMP 66/133-CG; Mines Branch; 1966.

Botham, J.C. "Progress report on studies related to the effects of preheating coal on carbonization"; DR MRE 70/4; Mines Branch; 1970.

Reeve, D.A. and Walsh, J.H. "The effect of using pre-heated coal on the energy balance of integrated blast furnace - BOF steelmaking operation"; Divisional Report MREC 74/1; Mines Branch; 1974.

Reeve, D.A. and Walsh, J.H. "The possibility of utilizing the

low-temperature pyrolysis of lignite to preheat coals prior to charging the coke ovens"; Divisional Report MREC 71/35; Mines Branch; 1971.

Steel, D.C. "The effects of drying and preheating coal charges"; FD 69/15; Mines Branch; 1969

Agglomerate additions

Price, J.T. et al. "Partial briquetting of coke oven charges"; Proc 39th Ironmaking Conf; AIME; March 23-26, 1980; Washington, D.C.; 39:176-185; 1980.

Price, J.T. "A review of partial agglomeration of coke oven charges"; Division Report ERP/ERL 77-128(R); CANMET; 1977.

Price, J.T. et al. "Assessment of variables concerned with agglomeration of coke oven charges"; Division Report ERP/ERL 77/42(TR); CANMET; 1977.

Leeder, W.R. and Price, J.T. "The effect of partial agglomeration of coke oven charges upon coke quality"; Proc 5th Bien Conf Inst Briq Agglom; August 22-25, 1977; Montreal; 15:213; 1977.

Reeve, D.A. "Briquette charging to coke ovens at the Keihin Works of Nippon Kokan Kabushiki (NKK), Kawasaki, Japan"; MREC 72/38; Mines Branch; 1972.

Formed Coke Program

Davies, R.G. "Formed coking studies. Part I - Review of the literature"; Divisional Report MREC 69/6; Mines Branch; 1969.

Davies, R.G. "Formed coking studies. Part II - A research project proposal to the Canadian Carbonization Research Association Technical Committee"; Divisional Report MREC 69/9; Mines Branch; 1969.

Davies, R.G. "Formed-coking studies. Part III - Progress report on bench-scale carbonizations of coal briquettes"; Divisional Report MREC 70/71; Mines Branch; 1970.

Davies, R.G. "Formed-coking studies. Part IV - Progress report on the development of a spouted-sand-bed carbonizer"; Divisional Report MREC 70/72; Mines Branch; 1970.

Jorgensen, J.G. "Microscopic examination of a formed coke briquet from Smoky River coal"; Divisional Report MREC 70/18; Mines Branch; 1970.

Jorgensen, J.G. "Microscopic examination of formed coke briquettes containing Luscar char and Great Canadian Tar Sands petroleum coke"; Divisional Report MREC 70/50; Mines Branch; 1970.

Jorgensen, J.G. "Microscopic examination of formed coke briquettes from

blends of Devco No. 26 coal with coke fines and oxidized coal"; Divisional Report MREC 70/28; Mines Branch; 1970.

Jorgensen, J.G. "Petrographic and related analyses of nine coal samples for formed coke evaluation trials in Europe"; Divisional Report MREC 72/122; Mines Branch; 1972.

Lau, I.T. "Formed coke program - Studies of the fluidization behaviour of coal and char in a pilot-plant scale hot-briquetting fluid-bed facility"; Division Report ERP/ERL 75-1; CANMET; 1975.

Leeder, W.R. "Carbonization Task: Formed coke sub-task progress report. Present status and short-term program objectives and organization"; Division Report ERP/ERL 75-10; CANMET; 1975.

Leeder, W.R. "Formed coke program - Background - Part I - Incentives for and suggested objectives"; Divisional Report MREC 74/12; Mines Branch; 1974.

Leeder, W.R. et al. "Formed coke program. Influence of size consist, volatile matter, and asphalt (pitch) content on the crushing strength of pitch bound briquettes - preliminary study"; Division Report ERP/ERL 76-179(TR); CANMET; 1976.

Leeder, W.R. et al. "Studies of heat treating and carbonization of hot briquettes"; Divisional Report MREC 74/74; Mines Branch; 1974.

Leeder, W.R. and Malette, M.J. "Formed coke program - Investigation of the physical variables of formed coking - Part I - Fines losses from the fluid-bed handling system"; Divisional Report MREC 74/7; Mines Branch; 1974.

Leeder, W.R. and Malette, M.J. "Formed coke program. Investigation of the physical variables of form coking Part II - A comparison of MREC handmade hot briquettes with BBF hot briquettes"; Divisional Report MREC 74/40; Mines Branch; 1974.

Leeder, W.R. and Malette, M.J. "Hot briquetting study using Western Canadian coal samples"; CANMET Report 77-33; 1977.

Leeder, W.R. and Malette, M.J. "Investigation of variables of formed coke. Part III"; Division Report ERP/ERL 75-154(TR); CANMET; 1975.

Leeder, W.R. and Whalley, B.J.P. "Formed coke activities with Canadian coals"; Proc 14th Bien Conf Inst Briq Agglom; August 1975; Hyannis, Mass; 14:119-137; 1975.

Leeder, W.R. and Whalley, B.J.P. "Laboratory hot briquetting of Canadian coals - Progress report"; Division Report ERP/ERL 76-96(TR); CANMET; 1976.

Pruden, B.B. "Formed coke program. External consultant's progress report - Sand bed coker - design features of a hot briquetting pilot development unit"; Division Report ERP/ERL 75-125(TR); CANMET; 1975.

Rawson, R.N. and Reeve, D.A. "Formed coke reactivity tests"; Divisional Report MREC 72/8; Mines Branch; 1972.

Rawson, R.N. and Reeve, D.A. "Measurement of the reactivity of formed coke using the Linder apparatus"; Divisional Report MREC 73/13; Mines Branch; 1973.

IRON OXIDE REDUCTION

Reeve, D.A. "Determination of the low-temperature disintegration behaviour by tumbling during reduction of iron oxide pellets submitted by Dominion Foundries and Steel Ltd., Hamilton, Ontario - Investigation No. 1"; Divisional Report MREC 72/69; Mines Branch; 1972.

Reeve, D.A. "Reducibility test on iron oxide pellets submitted by The Steel Company of Canada Ltd., Hamilton, Ontario - Investigation No. 1"; Divisional Report MREC 72/68; Mines Branch; 1972.

Reeve, D.A. "Some notes on the reduction of iron oxide with internal carbon"; Divisional Report MREC 73/23; Mines Branch; 1973.

Reeve, D.A. and Walsh, J.H. "High temperature assessment of raw materials for iron making"; Can Metall Q 13:3:495-502; 1974.

Walsh, J.H. and Reeve, D.A. "Iron reduction with concurrent production of fuel gas in shaft rectors"; Energy Use Conserv Metals Ind; Symp, Proc 104th AIME Ann Meet; Feb. 16-20, 1975; New York; 189-202; 1975.

PIPELINE TRANSPORT OF COAL

Botham, J,C. "Aide memoire. Notes on meeting with Shelpac-CPR-Stelco group concerning Project Cascade. (Burlington, Ontario, March 31, 1970)"; Divisional Report MREC 70/42; Mines Branch; 1970.

This is only one of a number of CANMET documents pertaining to coal slurry pipelines. For further information contact Mr. M. Skubnik of the Coal Resource and Processing Laboratory, CANMET, Ottawa.

ANNUAL REPORTS OF THE CCRA AND MINUTES OF MEETINGS OF THE BOARD OF DIRECTORS AND THE TECHNICAL COMMITTEE

A complete record of such documents has been maintained by CANMET since the inception of the CCRA. For information about availability of copies, contact Mr. J.G. Jorgensen of the Coal Resource and Processing Laboratory, CANMET, Ottawa.

ACKNOWLEDGEMENTS

This bibliography was initiated, on behalf of the CCRA Board of Directors, by Dr. D.A. Reeve, Secretary of the CCRA and Director of the CANMET Energy Research Program.

The advice of Mr. J.G. Jorgensen in the selection of documents is gratefully acknowledged.
